HKLM\Software\Wow3185Node\Westwood\Renegade

(NB: The numbers in the Wow3185Node part will be different to what I wrote, I am on my x86 laptop at the moment so can't check what they actually are but you should be able to find it)

(NB2: Run Renegade and the WWconfig tool in Admin mode or they will go into a virtualized registry location which is incredibly hard to find!)
