If you want to get a kill from air units instea dof having them fall tot here death.. do this: Get there h/a very low, then befor you fire the finishing shot get under them. When they fall out they're hit your vehicle and you'll squish them.

Personly I wouldn't bother to mess about trying to flying under them + when they are nearly dead there is about a 0% chance they are not moving... well unless they are a n00b but in that case they probally dont know how to fly a plane
