dun u guys agreeif u enter a game, and u keeping losing for abt 3 to 4 gamesit is better for u to quit the game and join other gamesi personally think that always happenso when ever i in a server that cause mi to lose 3 or more games. i will quit to join other game...and i think the westwood couldnt mix the teams more. dun u think u normally play with several same teammates over a few games, with little or no change at all to the teammates.....and 1 other thing, sometime it is not a bad player that is playing the game but it is jus their lucksometime i can be a mvp for a few times, but the next days, u can lost several games....so u r not a bad player if u lost, u r onli a bad playr if u fail to learn from mistake...

Actually If your in a game and you keep losing maybe you could pick up some tips from the people who are kick n A\$\$\$. I mean **** If your not on the winning team at least 3 out of five times then you do need some help! Don't be afraid to ask for advice... you never know who might help you!

A single man a team makes not. It doesn't matter how good you are, if the rest of your team doesn't know what it's doing, you aren't going to get anywhere (I know this from experience). You can even be the MVP in a game and be on the losing side regardless. You need people that know their roles and how to fill them. Without that, you lose.

If you are GDI, and you are playing with a lot of people on boath teams, all you need to do is get two engiears to go to the very far enterence at the beginning of the game and wait. Send the rest of the team to the front of the base out of range of the oblisk. Have the large group of people fire on indantry only so that the team can't get credits for just repairing the buildings you damage. The send one engiear at a time into the base. If they are good and they duck behind the rock and wall, you can get inside the PP and blow it up.

Under is the snow map that was available in the demo. It has 2 bases, with a Tiberium field and a
hill in the middle.

i got an idea, how about u med tank camp, w/ mrls pounding away at there strip/ref....u can take
em both out simply...if they are all int he strip repairing, switch to the ref, NOBODY WILL BE
INTHE REF 100% OF THE TIME!

Or have you just played the Practice Multiplayer wheir none of the Bots repair the base. All they would need to do is get a few tech's in the buildings and start repairing them. Once they start, they will get money for their team and at the same time, be able to allow their team to attack your base without you bieng their to stop them.
