So I've lost interest, I have other things to attend to; and in a serious relationship. I no longer have the time or patience to develop any more for renegade. However, this is not what this thread is about.

I have made some funky stuff, and I'm going to share the source of it all. So, here it is:
<http://www.littlebigsite.co.uk/Misc/Files/Projects.rar>

(Note, everything here, as far as I know was written by me (except the scripts.dll, ofcourse). There is definitely not any TT source here.)

I see "Seye" is in there. I'm not a coder, but can someone check just how complete it is?

Nice of you to release this stuff .

It is almost complete. Just a few bugs still to find.

Yeah, but not quite like jnz.

I'm absolutely gutted you're leaving renegade.

Disapointing to hear you're stopping things, but glad to see you've released what you have made.
So many things I need to go try now haha.

Thanks for releasing this stuff, and thanks for the help and code you've given me in the past!

Well that is ironic.

Bye.

I have every version of YaRR, SEye (somewhere) and as far as I know Lua Plugin (releases and source including versions public never saw), but I will not release anything without Daniel's consent. If I cared I could even rummage (possibly) up a version of Scripts.dll I was able to get working with .NET/C#/VB.

do you know whether the stuff you have is the same as in the broken link to the zip in the OP?
does your custom version use inter-process communication, function as a wrapper, is a .Net 'rewrite' or anything like that?

I have virtually -everything-. Me and Daniel were fairly good buddies back in the day when I supported Renegade through my business name. SEye (Smart Eye), YaRR (Yet Another Renegade Regulator previously known as "Smart Bot" or "SBot"), Lua Plugin. I even still have the full database of my forums probably with loads of goodie enriched post attachments and the SEye/SBot/Lua Plugin forum boards.

does that include dev versions of YaRR/LuaPlugin that weren't released to the public? I've asked Lone0001 about YaRR versions and he said i had the latest publicly released version.

<http://osdn.unifiedtech.org/> Probably not everything you're thinking of though.

I wish that would get deleted. I never expected my database to get replicated as someone elses work. I released it as a courtesy to gain access to the Lua Boards and some content originally for personal use. Disappointed, but I'm over it as its a petty thing to make an issue over.
