I am starting making models and need some help. I can't convert my w3d files to GMAX. Someone says that I need a converter. Is there any way I can do this without a converter?

There is a convert available for download I downloaded it before on the old forums...

But as the old froums were lost I have no way of retrieving the link.

Right now, if you want to do this, you'll have to purchase about 2-3 programs, or you can

download them off KaZaA, too bad i forgot the names of the files.

I was just browseing <http://www.cncnz.com/> and I found the converter again...

<http://www.cncnz.com/downloads/renegade/utills3.shtml#w3d> there it is...

Some featues are not supported yet but it works pretty good .
