It has been a while since I have been modding renegade, but mostly b/c of a TON of school work, and me trying to update my website (here), but I decided to come out with a new Halloween skin pack for CNC renegade to get away from all the stress. In this pack, the normal GDI Gold is changed to orange, some buildings have a Harvest moon on them (the WF distorts the moon though), and there is a special surprise for anyone who can find the real in-game fullmoon

IMG

Download at Samous Ind. File base here(RAR), or CNC Renegade forums(ZIP) bellow.

Install by adding all the .dds files to your renegade data directory.

=samous

EDIT*1: Seems my upload was premature, I forgot to add two texture files, the new ZIP and RAR files uploaded have the updated files, sorry.

Update

Thanks, it was originally created to be used on a pumpkin to make my own digital jack-o-lantern, but it looks cool enough alone

Looks good

Nice to see you again, Samous.

Thank you

Quote:Nice to see you again, Samous.
No guarantee I'll stay, but I do like skinning Renegade, it is the easiest of the CNC series in my opinion.
