I want to use blitzkrieg's music for a map. I converted it to an mp3 file format but it doesn't work(play) is there a way around this or is it just because it is copywrite?

What's the bit rate? I dunno much about how ren plays files, but it could be too high or too low or something.

Also, how are you making it play the music on the map?

.wav and .mp3 only, make sure the music is either in the .pkg/.mix or the data directory. Because if you edit the map in LE it won't save the music if its not in the .mix/.pkg.
