Too much of the same effect being used- really seems like you just went in photoshop to plop some effects on.

-The white on the buggy is unfitting. The black Nod symbol also stands out in a bad way because of it. White does not fit with red and black, atleast not in that way.

-Flamer looks like you just plopped some sort of rock effect on it and left it at that. Fairly unoriginal and just doesn't look right.

-Same shit with Apache. Just some effect/filter applied, no real change except making it look worse.
