Someone should make a Wiimote tbh, that'd be an awesome model.

Unless I'm looking at it incorrectly, there is already one in that link above. On the turbosquid page there's a screencap of just the remote.

So maybe download it and delete the guitar part, wiimote remains?

I think it'd be funny to replace the pistol with the wiimote, because shooting people with a wiimote just seems silly to me
