Is this a fresh install of Renegade?
Can you give us any details on what you've done/what happened?

You need to completely reinstall the game, use the link Goztow posted.

If you didn't legally acquire the game, legally acquire it. You'd be suprised at how much better it will work!

Yeah. Install Renegade from The First Decade, then skip straight to step 6.

Yes i extract them in the Renegade directory C:\Program Files\EA Games\Command & Conquer
The First Decade\Command & Conquer Renegade(tm)\Renegade end I deleted TFD end I
installed again end still are showing this messages

Modified server?

Try installing Scripts 3.4.4 (Latest scripts.dll) but only check "BLOOM" and "SHADERS" if you
have high end hardware.

Did you try what I suggested? Can you please try to make your posts easier to understand?
What is "patch 6.3"? What's the name of the server you join when you play renegade?

No, that's the version of that particular file, not of Renegade itself.

I'm afriad I really can't work out what's going on.
