I reinstalled renegade restarted the computer deleted all the files and repeated and still no luck.... (not exactly in that order...)  
Any idea why no sounds are working this includes music, cut scenes, and all other audio files. any ideas why it wont work?

Did you make sure that all the settings were correct in Renegade Config?

Is the windows volume control for Reneagde at 0 or muted (or both?). Is the volume turned up?  
Does sound work in other programs (Esp other games)?

---

Did you use the extended config? Using it sets all the volume sliders down and mutes them. Go in Renegade and set the defaults for the audio.

Me again

Which sound driver are they set to use?

Which sound driver is Renegade set to use? (Check the options)

Try the other driver options in Renegade, see what happens.

Change to DirectSound3D. If you're running Vista or W7 you cannot use any of the HAL sound

---

devices either.

People have also had issues in the past after installed programs like Total Recorder. If you installed or uninstalled something around the same time as the issue appeared, it might be a good idea to investigate that.
