I made this mod for MP originally but Remco from OSTK Clan asked me if he could run a server, its called OmegaAOW and one of its

features is manual tiberium harvesting:

There is much more to it than just this but i was making some videos tonight so i figured i'd post it here

See modinfo here: <http://forums.mp-gaming.com/index.php?showtopic=561&st=0#entry5114>

Hope you guys like.

The server on WOL is "remco003".
