Which half life 2 gun have you gotten the most kills on...
mine would be the gravity gun. theres noting better than killing a
man with his allies shotgun using energy field manipulation

People actually play HL2 online?

Unless you were referring to the normal HL2 stuff (Singleplayer). In which case, probably the
shotgun .

All weapons are awesome but the shotgun stands out, as for online crossbow.

My favorite to use is the AR2 but my most kills would be a split between tricking the npcs to teamkill or the crossbow.

Well until i have the comp version it will always be the grav gun .
Once i get the comp version(i don't feel like using torrents at the moment) it will be the crossbow, cause then i can just cheat for more ammo and can leave the combine nailed by the face to the wall(this is of course after i beat the game on comp)

it's quite easy tho, if you calculate a few steps and shoot forward..

What isn't easy when you use cheats? I mean, even online multiplayer games become easy as pie when you use cheats.

Hey, I can't help it that you needed to cheat in multiplayer on a public server where you didn't get special permission from the serverowner to do so.

I wouldn't but you also decided to derail my online game and/or my online multiplayer server.

Because of this, I find that i have the right to derail your topic as well. At least I'm not bothering other people with this, unlike you.

I get that he cheated, but ease up on him a little. He's not lashing out and pulling a covert7 or acting like troop.

on topic: I'd use the crossbow more if there was more ammo for the damn thing. I had LOTS of fun with it in Episode 2, though. Especially during that Combine attack in the little village you were in.

Episode 1 and 2 are basically continuations from where HL2 left off... kinda needed for the story. Episode 1 didn't bring too many new things to the table, but Episode 2 was fairly awesome.

Haven't actually played HL1 yet though, sadly. I hope to sometime.

I haven't played the original, and the only reason I haven't is because I know that this will be released with the same game play.

This. Black Mesa: Source is pretty much just HL1 but with better graphics.
