Yes i know its simple but i thought it looked good only took about an hour before i realized i could just select a certain area...

then the last of it took maybe 5 mins if even that.

if its been done before yet again i wanted to do it myself.

Looks good for what it is. Try using mipmaps, gives it a whole new feeling.

looks nice. but i don't like the inverted logos other than that nice. Try looking for some tutorials of

fancy photoshop effects. Just don't apply effects to the whole skin.

It looks like the buildings have frostbite, but that's not a bad thing for a skin, lol. I think that looks surprisingly good, for something as simple as inverting the colors. Good job anyhow.
