Right now its up as aow, but i will be changing it all around, to a custom DM server with diff stuff.

The name is A000JKG the game name is, JKGaming's Real AOW, ts server is still working on it let me know if anyone has a problem connecting or registering, it is 74.192.23.175:8767, i do have a irc up, not on st0rm was going to ask first before i just did it, but it is irc.mp-gaming.com 6667, #JKG-AOW, oh ya and it should be up on RR ip, 74.192.23.175 port 5489, if you have any problems with RR let me know and i will check it out.

Now most of you guys that have joined my server are now mod's or admins, so if any st0rm player wants to play some times just join and you will probly become a mod or admin.

so i will not be on it tonight, hopefully my mom don't shut off my pc when i'm gone, so if you join and play i will be making you an admin or mod if i know you.

For those who like to talk down to people go for it, i will not try and stop you i will just ignore you.

Good luck with that.

I've heard it can be hard to start up a server these days.

You can be the only admin. And you need around 5 moderators. They should be people who the community or you trust. You dont need moderators in an early server. Get around 25 full time players and then find moderators.  
good luck.

The mods admins is the people that i've played with for years, i have hosted a server before and i know what it takes to get it noticed, right now its aow untill i get time to mod it.

St0rm is involed with it that is why i say any st0rm players that join may become admins or mods.

the irc is now under st0rm.net
