Sorry to go off topic, but am I the only one seeing a mess of javascript in the title?

fake edit: On topic, I think the "skins" you downloaded may be jonwil's scripts. Your hardware probably can't handle the bloom effect and just shows up black. Of course, this is just conjecture since your posts are rather vague.

Run this but DO NOT CHECK "BLOOM" or "SHADERS" during installation.

Reinstall following this sticky:

Also, you still didn't post a link to your "skins". They wouldn't happen to be "cheats", would they?
