Just recently Jellyserver has forced me to d/l Rengaurd. I downloaded and installed it but every time I run Renegade I get audio but no video - just a black screen. Is this an issue regarding my graphics driver or what?

Jellyserver/n00bstories is one of the last servers up and running. Someone please help .

Only the scripts reinstallation is needed.

It couldn't have been Jelly that forced you to use RG.

We have disabled and have not used RenGuard in over 3 years.

^ AFAIK n00bstories is the last server to force RG.

There's still a few servers that run RG.

But only for varies commands like: !showmods, !rank etc.

Server's that I can remember that still use it: gng sniper serv, wnx server, n00bstories, wittebolx.
All I can remember

Thank you guys for the help - it was the scripts that needed to be reinstalled. And you're right it wasn't jelly server it was n00bstories that forced Rengaurd.
