Install the renegade FDS found on [ftp.westwood.com](ftp://ftp.westwood.com)

To create a server-side mod you would need the level edit tool on [ftp.westwood.com](ftp://ftp.westwood.com) or you could write code to modify the server.

Either way I would suggest running SSGM from [www.black-cell.net](http://www.black-cell.net).

Also, please type better sentences, and try to write better English. Although I recognise it is not your first language.
