What are the Best earphones to get? , I need some that are loud. I dont really care about lifespan as long as they lasts more than a month. Also under \$15 would be nice. I'm looking for suggestions that is why i did not use google to find any because all that did was get me EXPENSIVE shit. Last ones i had were JVC Marshmallow Earphones lasted about 6 months. May get the same ones, but i want louder ones.

Edit: Solved i got Gen 3 iPod ones for free

These are the headphones I swear by. I've been using them for like 12 years. Great bass response, loud enough to be used as speakers if you turn it all the way up, and fairly durable. I'm on my third pair but in 10 years that's not bad.

You can have one or the other, not both. Are you looking for good ones, or cheap ones? if you're looking under \$15, it really doesn't matter what you get.

under \$15 is just a nice add on. if it is not possible under \$15 thats fine. oh and earphones... i have also heard them be called earbuds, whatever you wish to call them, is what i meant. is a picture required or is this enough information.

Within that price range, the JVC's are the best you can get. What I did with mine was take duct tape, and wrap it around where the wiring joins the 3.5mm jack. It helps the cabling last longer.
