Needless to say we got owned lol, none of our team had a tank to defend the base

Good organizing on Nod's part though Teamwork ftw

This is a mod for UT3 (soon to be standalone on UDK) and you can download it
here: http://renegadex.game-maps.net (3 mirrors available, USA, NL and GER 100mbit)

Seeya ingame hopefully

killing the buildings instead of one lone engi who is just sitting there lol.

Or actually aim straight instead of going side to side

We have two DM maps already made by Jam and Alexrirak.
M00_Tutorial(beta) made by alex resembling the looks of the original m00 tutorial map found in Renegade.

And Stone-House(alpha) made by Jam which is a small DM map.

We sometimes switch to them for a few minutes

You people really need to reconsider your music choices for your videos.

Quoted For Truth.

Although it's very hard core, a better choice could be made. And where's the SFX?

Yeah I also wasn't a fan of the music in this one either. I think the videos in the official videos suit the game a lot more.

Serverside stuff is already implemented into Renegade X. Go here: http://www.renegadeforums.com/index.php?t=msg&th=35771&start=0&rid=3 158 and read about the Renegade X mod tools, MP-Gaming server-side mods, aircraft mod, and custom maps.

As for infantry only maps, there is an infantry only fanmap on the MP Gaming server.
