Hi all,looking at the rankings I see something strange. How can somebody have 105 wins and just 2 losses????This person (ghost1988) must be special, please do not think I'am saying he is cheating.Just wonder what do you think of this? How on earth do you manage this?GrtzWOLname Dutchduc (unfortunately a bit more losses )

This isn't the first time we've heard this name on these forums - ghost1988 supposedly runs his own servers where he gets p\*ssed at anyone who DARES do better than he and does a little spring cleaning about 2 minutes from the end of the game, ensuring he gets MVP and the most ladder points.Pure and simple, he's a cheater.

Thank you for letting me know about what he does because I dont like to join a game with a loser as a host

If you get more afidence against this guy we can report him as a cheater, so bring them on and ban this kind a ppl for ever as they spoil the game!

correction i take back that last post, i checked some games of his and he just gets a lot of ladder points, and yes he gets MVP a lot, but he plays a lot 40 player games maybe even 50 player. But if you dont get a lose when you leave the game i dont know because when that is the case he still cheats.

I got kicked from a server once for killing some guy chopper-to-chopper flawlessly, I didn't take a single bullet.

Hmm.. if anything else, that 1400 point game sure is fishy. The only thing I can think of is that he probably hosts the server and doesn't get any lag. That was a 140+ person game, so I'd imagine that the other people must lag some or quite a bit. win/loss isn't a big deal to mean in terms of numbers, but I like to win of course. More importantly, I like to have fun and sometimes I have more fun during a loss than some of my wins.
