I just reinstalled renegade on my laptop and i installed 3.4.4 (no luck) so i install 2.9 and i get blank screen.

EDITx2: oops i forgot the OS specs

Processor: Intel(R) celeron (R) CPU 900@ 2.20GHz 2.19GHz

Install RAM: 2.00 GB

Bit version : x64

Operating system Windows 7 home premium.

I dont know why i had this error, its never happend before.

may i suggest you remove/delete all the 3.44/2.9 script files, and reinstall 3.4.4?

Ok ill try that.

EDIT : thank you Goztow, i am really grateful of you, *adds Goztow to the decent people list as mods*

I would have suggested you simply put the renegade scripts in the microwave for 30 seconds, but whatever deleting that file works just as well.

Try running in admin mode and XP comatibility mode. This has solved this problem for some.

Ok lets see if it works.

EDIT: it works again
