Someone needs to get Goztow or another mod to update the links in the first post.

If you ever need anything, ask Lone.

He has bloody everything in his archive.

i have a question.
How can i use it with Renegade Resurrection, because if i put the dll files in my ren folder, the
Resurreciton Launcher doesnt start

You either use the reticules or you use resurrection. Not both.

I dont know whether RR allows custom scripts or not but else the RPW dll (ebon) can be loaded through scripts instead of a binkw32.dll or mss32.dll hook.

That could then fix the issue.
