WTF deathlink posted a release?!? Yea right I didn't expect that too.

Anyway I played our old CCR again 1 or 2 weeks ago and had some fun with the officer bashing snipers in field tunnel and talking a bit. The result was an idea which was quickly put together afterwards:

Female Nod Officer:

I didn't make anything new and created that model with existing stuff from ren.

The point now is that I'm not a very good rigger and I don't know how to make a real complete character setup (what is the c\_ag\_nod\_mgo.w3d, c\_nod\_mgo\_.w3d for? I have no idea what's in there). So as you can see my rig is not the best one. That's why I attached the source of this model. Maybe someone can rerelease this as complete char setup with a better rig. I have no time and experience for that. There are max/gmax files in there. I didn't add the textures to the archive because they are all in renegade. You know where to find them ^^

For players I attached it as replacement for the primary sakura model. I wasn't able to make it as replacement for the nod officer.

As far as I know it doesn't work online. Somebody tested it and it doesn't work. Maybe it works when somebody rereleases it.

Have fun.

Woah, nice man! Another awesome release by DeathLink6.0

Even if it's just using pre-existing stuff, it's still VERY well done (besides, if you do it right, who cares if you're mixing and matching pre-existing stuff?)

If i have permission from DeathLink

Can i change the red to urban camouflage? i want to make sure its in camo.

Also epic piece of work, its time theres a female officer .

I just said this because it was one of the few projects where I made it that way and where the result turned out very well in my eyes.

If somebody improves the model or the setup, please send me the source.

Can i change the red to urban camoflage? i want to make sure its in camo.

Do what you want with the source. Just give me credit where it is necessary.

For example you can also create a replacement for the alternative sakura model where you texture the female model with your modified version. Than you can have both variants. Just an idea.

Just saw that I uploaded the For-Players archive twice instead of uploading the source files.

Take a look in my first post. There are the gmax/max files available now.

Can i change the red to urban camouflage? i want to make sure its in camo.

Also epic piece of work, its time theres a female officer .

So basically u want to re-skin it and make it look horrible.

No thanks.

Nice work Deathlink

Nice work Deathlink

Erm when i ment urban camoflage i ment it from a picture

Besides my nod is skinned with urban camo, looks out of place with a bright red mixed with camo

I have no time and experience for that.

Rigger, please.

I like the model, looks very nice. Now renegade is at last enforcing an equal opportunityies policy, do you plan on adding a Mobius in a wheel chair or something?
