Well as you can see I found the beta chaingun.
Which is very easy to find. (its on the transport choppers)

Though I wonder are there people interested in it.
If yes shall I keep it totally standard or remodel some parts?

over here a picture of it, it has a whopping total of 71 polys -.-

I'd remodel that beast. ^^

Haha, nice find. Too bad it's such a low-poly third person model though. I'm quite interested in this nonetheless.

The thing is indeed as Blacky has posted.

If remodeld it nearly looks as the chaingun that is now in Renegade.

Well besides the handle and maybe texture wise it wouldnt be that different.

So I will have to see and try out some stuff.
