Not a major problem just an annoyance . I have just started playing renegade again and have noticed something that annoys me. For some reason the text on the server loading screens is missing, the text that gives you suggestions on playing the game. Although I know the stuff it says I would like the text back instead of just red boxes. Anyone know how to fix this?

This is due to you using a widescreen resolution. Nothing you can do about that, really.

Its not due to this, reduced my resolution to a none widescreen and still does it.

I downloaded a bunch of models not to long ago and mine now does this. I ignore it. Do you think this could be your reason?

not skins, models

i dont have any skins atm i deleted them all in an attempt to fix it

AFAIK there is no wide screen resolution for ren at all. But if you use a wide screen, the problem you described appears. As Goz said: nothing you can do about until there will be a wide screen support for ren.
