Hello all,

I just wanted to let you guys know about our new UDK based website: <http://www.udkx.net>  
We will be posting tutorials (with permission), video's and news about the UDK Games that are currently available.

The site is new so keep that in mind, we still have a lot of work to do but we're getting there slowly.

Most downloads for the UDK Games have video previews in MP4 format.

All UDK Games we can find will be added to the forums and have its own category on the site and we hope that some people will be interested in joining the community.

Feel free to submit any news in any of the categories we have on the site at the moment.  
New news or tutorials will be pending approval, one of our staff members will review them and add the files if any to our database and video's in MP4 format.

We hope to make UDKx.NET a success and we need your help  
If you are interested in helping us in any way possible then feel free to join our [#udkx](irc://irc.mp-gaming.com) in channel #udkx

Thanks,

greetz zunnie

The site's definitely a great idea - compile all the tutorials you can find. The UDK is definitely the biggest thing in the game industry this year - make fully standalone indie games for free on one of the best engines of this generation, what more can you ask for?
