im playing around with my config to try and get better use out of free aim

i want to assign something to the left Alt key... but for some reason my rene wont allow it. Meaning that when i select an action/movement and press the Alt key, nothing happens and ofc it isnt assigned.

is this just how it is, or is there something blocking it....

Alt is used for radio commands. So obviously you cannot map it to something else.

Guess that makes sense

what a pity
