Hey all,

Im just wondering how many servers there still are on renegade and more importantly, how full are the most popular ones?

Even better would be if you could give me a link to a server list so I can see for myself without having the game

The reson I ask is because I used to play renegade and I simply loved it. I moved on to other games, and recently remebered it, although I have lost my copy . I thought it was long dead, and even tried connecting on my friends computer with no success.

I'm glad it still seems to be alive, and i'm thinking about buying it again to join you guys (and of course beat you all ...well not really beat you )

Thanks

Two, maybe three servers that people actually play on. I'm not going to name any of the servers because people would go batshit and start drama when their server isn't listed.

Ok thanks, are you sure thats all around the world? (not with the search option of 'only in my country')

That kinda sucks...

Any idea how many people are on those servers? and is it worth buying for that?

I'll PM you the servers and the information for those servers, save having to post it here.

Yeah there's still a lot of communities left, but player counts are pretty low in most. There's more people left in this game than former players think though. It's not hard to find a game to join.

Jelly and n00bstories are the two most prominent. There's a lot of other communities though, and various co-ops. The problem is, no one joins them unless there's already a few people in the server. So you either have like 6+ people or no one.

There are plenty of places to play, so don't worry about not finding a match.

Well, this gives you a general idea about players, but not the server names.

You buy the single game, or you get the The First Decade package?

Too late now if you didn't get TFD I guess... but it has more of the old C&C games.

Overall Renegade active player count seems to have dropped off by roughly 33% from a year ago.

I havent played in a while but a good estimate would be involved with the fact

1 or 2 jelly servers always above 25 players (full often)

storms servers are always above 10 players (excapet co op witch is above 5)

atomix is always above 10

Exodus servers rarely has anyone and rarely gets above 20

N00bless (no idea)

N00bstories (no idea)

And a few other servers that have 1 or 2 people

(i havent played in some time so im not sure if this is still true)

Is RP2 played on much anymore?

We need to post a sticky on the status of Renegade. Five of these threads pop up every month.
