I am looking for anyone with standalone Renegade in any language other than English. I am also looking for anyone who has any language version of TFD (although I think it only exists in English)

All I need from TFD (any language) is for someone to upload their game.exe file somewhere. (someone who can guarantee that its the game.exe that comes with TFD and has NOT been modified or replaced e.g. by installing RenGuard or Core Patch)

I have someone helping me with the German language files I need, its unlikely that German TFD will include anything different to regular German renegade except for the 1.037 patch being already applied.

The WW FTP had all 1.037 patches for all languages, hence all game.exe files for 1.037 in all languages, right?

Well here is my TFD exe anyway

To big to upload here even as ZIP

Thanks, that's exactly what I needed.

TFD had a different exe file to normal renegade due to the copy protection (or rather lack of it on TFD)

I have confirmed that the exe file is the same on all languages of renegade (and therefore presumably all languages of TFD)

So now all I care about is if someone with French, Chinese, Japanese or Korean renegade happens to appear (although I suspect that's unlikely to happen)

I'm gonna speculate this is for the TT patch's localization, must be progressing nicely

Its not for the localization, its for the anti-cheat.
So that we dont reject people with legitimate foriegn language copies of renegade.

There's a guy who used to play on my server by the nick kamuixmod who had a Japanese ISP. I'll ask around if anyone's been in contact with him lately.

Edit: Turns out I was wrong. He doesn't have it.

I need more than just the game.exe. I need files from the game install CD, I cant say which files I

need without knowing what files are on the CD and their sizes (including any and all files inside the game1.cab file and the folders inside game1.cab)

Zooma, that game.zip file in your last post contains nothing.

If there is a way you can upload the entire CD as an ISO somewhere, that's the easiest way to make sure I get all the files I need.

That zip file contains game.exe which is NOT what I need (game.exe is identical on all language versions of renegade).

I need other files from the install CD, not game.exe. I have no way to know which files I need without knowing the name and size i bytes of every file on the install CD and every file in the game1.cab on the install CD and its size in bytes.
