In-game I've seen peeps able ta buy vehicles like massive without the waiting and able ta mass produce over the limit.

I've been looking for this on both sites (the Jelly-forums (or w/e) and this site) and I cant find it. It's very annoying waiting to buy a vehicle and it says "Limit Reached" and then all of a sudden it says "Building"

I'm sure (hopefully) it's not against the rules ta have it bc some mods use it and others.. It'd be nice ta have it

Thanks man... but any chance someone could help me install this. I looked on another site but turns out peeps were having problems starting their game(s) and stuff and they requested asking here instead.

It's an auto installer. Just double click and off you go. For a full install guide of all recommended patches: <http://www.thekoss2.org/page.php?m=2&s1=17&lang=en>

Note that you need Directx 9.0c or higher for it, or you will end up with a black screen in game.
