Hi all

I was wondering if anyone could tell me the name of the ice textures used in C&C Glacier.

It's called I02_ice.dds, and you can find it in m02.mix

Wont this conflict onto other maps that uses I02_ice?

A tip I can give for the future is to open the .W3d terrain file for a certain map in W3dviewer.

It shows you the textures/names.
