It's been ages since I posted about any of my releases here, but I feel that my little signature is not drawing any sort of attention to the site, and perhaps the releases on the site are going un-noticed?

I also decided to post about this release, albeit a very small one because I made a small movie to go with it, and I've neglected my video gallery practically since it's creation...

Quote:

This plugin makes it appear that the planter of a beacon types in team chat where their beacon is, and calls for help from their team-mates.

For example, if I place a beacon in my own base, or no where near contact with an enemy building in team chat it would say:

"redude: the beacon is a fake!"

However, if placed the beacon at an enemy building it would say:

"redude: please help defend my beacon at the <building preset name here>".

It's not a big change in the server, but should help frustrated players who want to help defend the beacon, but do not know if it's a fake or a real beacon.

I've added a video of this working in on the video gallery, here:

<http://spencerelliott.co.uk/video.html>

It's also uploaded on youtube, here:

http://www.youtube.com/watch?v=Ydh911f18gU&feature=youtube_gdata However, it's terrible quality and I advice you to use the site instead.

You can get the files you need here: <http://www.spencerelliott.co.uk/downloads.html>

There are currently over 60 releases for renegade available on the downloads page. Ranging from in-game modifications like this one, to plugins that affect outside the game server, like TeamSpeak regulators and other very cool stuff.

Very nice reborn I made something like this a while ago (actually it disarmed fake beacons) but never got around to making a release.

I actually also had no idea about your site. lots of stuff on there that's quite interesting

I remember visiting your site a few months back, but have lost track of it since. Looking through the list of releases, there isn't much I can use personally since I'm not a server-owner, but I'll look into checking the site more often. If you have anything that might help create co-op maps + servers, I'll be sure to pass that around to people.

I wasn't able to read the text clearly for the demonstration video you posted, unfortunately. I turned up the quality to 480p and even tried fullscreen on + fullscreen off, but still couldn't make out the in-game text each time you planted the beacon.

But to all server-owners, SSGM is great for the handy plug-ins people can contribute, and reborn's 60+ releases on that site should prove handy to some of you.

Nice idea
Though most of the time i see panic strike when the enemy places a beacon

Acouple months ago i played on some random server that stole everything from BC. From the EMP crate to the veteran system. Dont remember what server but they should have given some

credit to vloktboky, WD, or atleast BCServ.

Good job, I like this.
Also thanks for helping me find the beacon planter function
