http://www.zunnie.net/renegade/coop/Video_Tutorials/zunnie_tut1_coop.wmv

Now i'm a shy guy so i didnt talk in the vid but type lol

Nah seriously i tried but i kept fucking up the vid LOL...

Anyway i tried to be as clear as possible and hope it helps some people.

It explains how to write a script for a zone where a player can trigger it to do a delayed dropoff of 5 seconds.

Dont ask why it zooms in sometimes, no fkn idea why it does that lol.

Enjoy.

Greetz zunnie

I had avatars turned off so I didn't even know, but you look like a nice guy

And the tutorial is good in my opinion, even I can follow it with zero knowledge of C++ or whatever it is

lol thanks

I hope it is useful to some people who like to make special stuff for coop for example.

I'll probly make some more soon

You could provide someone with the dialogues and ask them if they could make a voice over for you

I think you should talk, it doesn't matter if you get stuck for words, forget what you're saying or fumble/falter; you're doing this to help others, not for an audition.

The tutorials are great! Awesome stuff!

I see what you mean by the random zooming starting at about 4:50 minutes into the video. Most of the time it wasn't a problem -- could still read the text and follow your actions fine. Sometimes it was even helpful that it zoomed in.

The VisualStudio stuff was interesting to see. Watching that part of the video could help be an icebreaker to learn how to really do some programming for Renegade.

Having no voices for the video was fine with me, for this kind of tutorial video, being able to read the comments/explanations on the screen rather than hearing it was very helpful. I'm not sure how much I would have understood if it was through voice. Nevertheless, any kind of video like this is pretty helpful for the community.

Keep the good work up. =) Hope to see some more.
