<http://ren.game-maps.net/index.php?act=view&id=554>

I think if you run wolspy your server will be on the RR listing too.  
As wel as on gamespy and xwis.

ive tried everythin it just wont work and if i do it trough rr  
(GameSpy Query) Failed resolving host 'master.udpssoft.com'. Retrying in 60 seconds.

Edit hosts file in C:\Windows\System32\Drivers\etc\

and add there this:

69.10.30.248 master.udpssoft.com

Next you cannot see server on list if you are on same network as server.

No you are still on the same network then.  
YOu can't see servers you host on GSA/RR if you are in the same network as the server thats  
being hosted on it. Known issue.

What you can do is:

- Host server in xwis mode
- Add /multi to the shortcut to start Renegade up then you can host and play at the same time.
- Use +connect lanip:port +netplayername "PlayerName" to join the LAN server.

Maybe this helps?

ok i got it my server is shown on RR and my pc is in other network apparently so im glad not to go  
all that trouble ^^

C:\Windows\System32\Drivers\etc\

and add there this:

69.10.30.248 master.udpssoft.com

Next you cannot see server on list if you are on same network as server.

Isn't that the master.gamespy ip. 92.242.144.2 is the master.udpssoft.com ip?
