just noticed an article about renegade (x) on a (quite popular) german it-news website just an hour ago:

<http://www.golem.de/1010/78434.html>

didn't see anything public about ren like this in ages.

I do not speak German, but it's still nice to see it's in the news.

I do know a little bit German and it's not about Renegade as in the original.  
It's about the Renegade-X 0.55 patch.

EDIT:

Only the last paragraph seems to tell something about the original.
