It was laggy for me that game and I hope the info on the top-right corner helps. Just thought it was strange because of the bullet hole on the blue wall that came from the Deadeye player that shot me from the corner. That was the spot my engi's head was in.

just curious...

Impossible to tell.

You can't line up bullet holes from the shots of other players from your client.

Case and point:

If you stand against a wall and ask someone to shoot around your head, no matter how perfect they circle your head with bullet holes, it will look like a random jumbled up mess on your screen.

Big heads is easily detected and I personally don't think Awyxde cheats because his aim is awful

Well if troop said the guy is legit because of his terrible aim, then it must be true cause troop is the expert in everything related to renegade talent.

lol.

Most servers have biatch or Resurrection that can detect big head.

Don't even know who you are but by looking at your account, your most likely someone evading a previous ban (but thanks anyway for reaffirming my statement).

Anyway, like Blacky said, BH is banned for automatically anyway
