If you can get \$1000 and a friend (or someone else)you can destroy the Obilisk as GDI with few losses. First get a havoc and have the other guy be an enginer. then go through the tunnel near the Gaurd Tower to the enemy tunnel closest to the obilisk. Go to the edge of the tunnel with the enginer BEHIND YOU. Then run strait toward the obilisk. DO NOT STOP BEHIND THE ROCK!! the enemy will spot you. Havoc will obsorb one shot and will still be able to make it there. With all the C4 you can take it down. It works best if its 2v2 (then the enemys probabaly wont see you. If theres lag it WILL NOT WORK! The Lag pushes you out of the way and youll get killed before you can get there. If you think of another way (other than a full out assalt) on how to kill it, well, JUST DO IT. thanks

In most games when you start with (0) credits people rush the harvester first shooting and reloading forever to destroy harvester. Instead...all you need are 2 basic engineers with their 2 C4s each. Run onto green where harvester is stopped, plant your 2 C4s, while backing up.....BOOOOM, harvester is no more. Pay attention to your shields of course.....Laugh. Out of the 30ish times I have done this I have died about 5 times. If you die and re-appear infront of panel, choose basic engineer again and run to recharge your harvester....If it still exsists! Keep charging upto refinery incase the enemys timed C4 has not gone off yet.

As GDI you can run out of the airstrip tunnel, behind the first rock...wait a few seconds and then run behind the next rock...wait a few seconds and run left to the refinery wall. You are safe here. You can then jump UP on the ledge and run on the wall towards the obelisk. At the end of the wall, jump a couple of times and you can make it inside the obelisk without it ever firing.

It works sometimes but you need there to be no lag. Besides, the Obelisk cheats.

BTW, an even better and sneakier way to destroy the Obelisk is to get several Hotwires to sneak in behind the Harvester.

Posted by [Anonymous](#) on Tue, 18 Jun 2002 04:57:00 GMT

[View Forum Message](#) <> [Reply to Message](#)

a even better idea is... to have 10 havocs and 15 Hotwires and then assault the whole Nod base from the tunnels in under but with backup from 5 mammoths and 2 meds and 1 apc

dealis to destroy the harvy but let it live as longas possible. Example: City, 0 credits. Bothteams

harvester. So try to kill the enemy harvy on his way home und defend your own only if thereis a chance to get it home. Cfx

First of all, you need 3 timed c4s to destroy a harvester. It has 1000 (500/500) hit points, like any building. So 1 hotwire/engy+soldier/2 engys would be enough to get rid of it. One more thing... On what server(s) do you play? I have never seen morons trying to destroy the harvester with auto rifle. Usually ppl lay their c4 on it, before they start shooting at harvy (just in order to get some points).

[View Forum Message](#) <> [Reply to Message](#)

You get ALOT of money by just shooting at it with the machinegun. Of course you can't destroy it but if you have already planted your c4 on it it's the only useful thing you can do. Not killing enemies cause you don't get points/credits for it.

quote:Originally posted by YSLMuffins:It works sometimes but you need there to be no lag. Besides, the Obelisk cheats.Yes, yes it does. Like firing through itself to shoot things at its base trying to walk in the door, for instance. If the beam comes from the crystal on top of the Obelisk, then it shouldn't be able to shoot you if you can't see the crystal.

U.C. Well I think I have played in most games and I see your point with people just shooting harvy, if you say they are morons then I will blow them up.....Laugh! I know there are many tactics and some maybe old, so I posted some tactics knowing someone will always have a better way. Thanks for replys guys. Cya out there.

You give stars by clicking on 'member rated' under the name of the guy you want to rate. You quote by typing [.Quote] text [./QUOTE] but without the points! Or just click on Reply with quote' above the text... [June 18, 2002, 15:38: Message edited by: eggmac]

I lay my C4 on the harvester and then I start to shoot it with an auto rifle. I think this is the bet tactic because if you have more people doing it then it is gone and you ged lots of poinds/credits for just shooting it.

Plant 3 beacons at the same time in the tunnel where the money is, right against the wall. If they all survive and detonate, it will take out the Tiberium Refinery.It's not a bug...it's a feature!!!

Most people run out with the soldiers where I play and do the "plant-and-fire" thing. I always pick an engineer and place not just the timed, but the remotes, obviously. I don't care about my life since it's a freebie character anyway, so if I've placed my timed and detonated my remotes I've done my part.

Actually, the Hotwires sneaking behind the Harvester worked because the other team destroyed our Obelisk this way.

Just sidestep....the obby will try to target you but not shoot...watch out for turrets though and it works on all maps. I turn sideways and side step straight to the obby. Once in awhile just add a quick turn in here and there...DO NOT WALK FORWARD/BACKWARDS. Just sidestep. The obby hums...fires occasionally and usually misses if you keep going straight.
