any help would be appreciated. dont care what anyone says, renegade is still the best game out there.

very first line says  
Exception occurred at 0x12812C84 .text:0x12812C84 (shaders.dll)

so do i need a new shaders.dll?

Very simple.

If you use a custom hud, but didnt put the correct shaders.dll in your Renegade folder. Then it crashes, cause on some custom huds is this enabled:  
WeaponImageEnabled=true

And this setting crash the game without a fixed shaders.dll
