All I want for Christmas is this beloved TT Patch.

Any news?

What we need is a complete revamp of the game.

- deadly anti-cheat
- 2 seat apaches
- extend orca/apache rocket range and speed to real-life similarity lol
- increase orca speed
- fixed city map side pillars (fix all maps ffs)
- uparmoured transport choppers with a gun on each side
- new model for officer rocket launcher along with AGT missile style homing rocket with splash (for anti-air)
- more radio commands
- more flashy weapons fire for all weapons
- working water on all maps with all chars given ability to swim (with 45 sec underwater time before need for surface)
- a radar that actually makes sense and works
- fix all first person arm animation for each char

-Dead 6 chars actually have some in-game advantages/differences:

> Hotwire loses pistol and gets deadly rapid-fire Uzi with shitons more c4 but gets weaker health/armour

>Gunner has extra badass armour with loud taunting sound after each rocket fired plus melee ability with double fists

>Patch gets dual-wielding flechette guns lolol!

>Deadeye gets increased walking speed with default knife

>Havoc gets badass nightvision with usable wrist-mounted EVA info (like custom radar, nearby enemy vehicles, etc etc) along with 5 timed. Comes with knife and can dual-wield pistols. Can also neck-grab close enemy infantry and kill with a cruch-snap (great for tunnels in canyon lolol).

-All Nod and GDI officers can call 2 UBER-bot soldier backups (these bots are extra deadly and can skullrape any1 on sight)

-all SBH will be given knives immediately. Their laser rifles will be downgraded to laser shotguns (lolol). Will lose the timed c4 but will get 2 remotes.

-BH sniper walking speed increased. Can melee attack other infantry Halo-style with sniper gun. Also has extra head armour due to upgraded helmet.

-Laser chain gunner: increased range

-both Sakuras: loses pistols and gets long range pepper spray gun that makes enemy player's screen black for 3 secs (LMFAO!)

-Default Rave has no changes

-Tib Rave has ability to heal in Tib and also has much increased physical powers. (Can significantly pose a threat to buildings due to new "Tib Fists" punching ability on MCT...also works against tanks and infantry). Can also swing Railgun and break enemy infantry faces.

-Flamer tank gets humvee style gun on top but can only be used by a second player who occupies the seat  
-All tank rounds speed increased

that's all for now.

Holiday... it's something you do for enjoyment, relaxation, entertainment etc. Different people enjoy different types of holiday but generally the intention is to have an enjoyable time without doing any work. Often involves aeroplanes, but not necessarily.

Personally I enjoy holidays to places with a lot of culture to explore and history to observe, or activity based holidays such as Center Parcs in the UK. Never been a fan of going on holiday to sit and do nothing whilst cooking in the sun, seems like a waste of time to me, but everyone has their own preferences.

Never been a fan of going on holiday to sit and do nothing whilst cooking in the sun, seems like a waste of time to me, but everyone has their own preferences.

This thread is now also about holiday preferences.

I, for one, prefer sitting down, cooking in the sun, having a cold drink, and so on. While I value seeing some culture and history, my opinion that I'm busy with my education (work for others) for god knows howmany days, weeks, and so on. Our traditional lifes are repetitive, so when I'm not having my regular schedule, I'd appreciate 2 weeks of doing absolutely nothing and chilling out, while not having to worry about anything..

I'm not a fan of having schedules and so on on holidays.. I know of families that get up at like 5 o'clock in the morning to get in the bus at 6 o'clock, go sightseeing the entire day, get back at, say, 8 o'clock in the afternoon, have dinner, have a drink or 3 at a bar, then sleep. While I appreciate doing that once or twice during my holiday, I can't be bothered to do that, say, 5 times on a 2 week holiday. (And yes; I know families who do so).

Last summer holiday I met this family who had their "Day meeting" every evening, where they'd discuss what they would do the next day, schedule all that shit, and so on. For me, personally, that's not a holiday at all. Like I described in the first paragraph; I'd just like to sit down, relax, not worry about anything.

On-topic: Take your time, enjoy your holidays, and get a good product out there. (But don't let us wait for another year; Renegade may be dead by then)

Hypnos wrote on Wed, 22 December 2010 22:23Both of you shut the fuck up...

All I was asking for was some news. :S

I would insult you but then you probably wouldnt read this so...

Don't try to boss people around when you contribute nothing to the project. These are people in school, or working, or trying to be with their families. They dont have to do anything. They willingly contributed their skills and time for free and they can do what they want.

Enjoy the holidays as you please.

Well, a very small update then, before the holidays StealthEye was very busy getting the netcode to work properly again, so the fds wouldn't ned to rethink every packet for every client. I'm not sure how far he got with this, but not yet far enough to do a new server beta test. We hope it will be possible to do a new test in the weeks after the holidays.

---
