1. Wrong forum. You want to post this kind of issues in Technical Support->Renegade Client

2. Once you are in the correct forum, read the sticky's

Nice post edit after my reply xD

You don't want to use RenGuard anymore. It's outdated.
4.0 will include the new anti-cheat system which will make RenGuard absolete anyway. (though no release date on 4.0 yet)

It's an anti-cheat, you don't have to use it.
Did you start the game before and not get any server list?
