These reticles are not exact and some things are added or taken away.

some reticles look better in higher or lower resolution.

this is not for different weapons.

if this has been done before inform me.

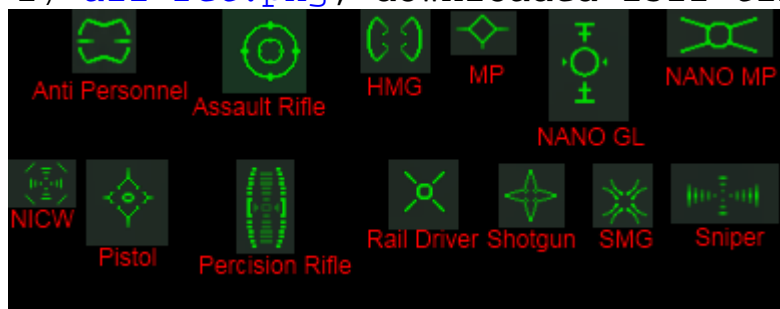

comments.

Edit: pistol

Nice rets bro. If I can get Ren working again, I may end up trying the pistol or sniper one. I prefer dot ret over anything, but these look pretty nice.

Zeratul, do you have and played RF2? If yes, please do tell me how it plays. I have played Red Faction and really loved it; it was badass guns and excellent gaming. Does RF2 play the same? I heard there was too less missions?

I have RF2 but never played through with RF1 so im not much for comparison.
There are 11 missions that all have sub-missions
17 weapons
4 types of grenades
i found this game tons of fun.
but the downside. you cant tunnel through walls only some things are destroyable.
The bots are more of a challenge. you can create your own bots
good amount of multiplayer maps and game modes

Yes, multi is fun with a friend or two. . also always fun to sit and watch the bots kill them selfs with that stupid "Green launcher" thing i hate < Z3 knows what i mean :/ > . . Anyway back to topic, i am unable to use pistol, i got it working "Some what" but it spazes out and turn into something you see on saturday night live. . might need to make that special format for some people if they have the same problem :/

The bots are more of a challenge. you can create your own bots
good amount of multiplayer maps and game modes

Thanks, looks like I can buy and add it to my old game collections to play whenever I feel like it.

Yeah, I head GeoMod or whatever that was is not really prominent on RF2.

btw, do you get any vehicles to drive? I would love vehicles as RF had some badass vehicles, I loved the chaingun on the flying gunship thing. But not really that important if I can have some good FPS missions.

One more thing, is there a bot-only MP mode like in UT3? So I can just start a game and screw the bots?

thanks,

Yeah in RF2 you can setup bots, say i name one String set his attributes to Agressive / loves snipers / max agility for speed but make him weak with a little extra damage in each shot. you can make them super tough to fight. so yeah can screw the bots

One more thing, is there a bot-only MP mode like in UT3? So I can just start a game and screw the bots?

thanks,

The vehicles you drive/gun(SP only) are

AHC-36 Military Gunship

S-271 Stealth Submarine

Military Heavy Armored Tank

Battle Armor (SOP-MA1)
