Hey Renegade-players.

Here I've taken some sounds from CRYTEKS brilliant Ego-Shooter "CRYSIS". Crysis is one of the best source getting high quality soundfiles, so I decided to just move some sounds from Crysis to Renegade. In the first version, there are already very many soundfiles:

Toggle Spoiler

Medium Tank
Mammoth Tank (not complete, i don't know the shooting-soundfile)
Autorifle
Sniper rifle
Ramjet
Pistol (SOCOM sounds)
Humvee
GDI Apc
MRLS
Shotgun
Volt rifle
Grenade Launcher
Rocket Launcher
Chaingun

More sounds will be in the next version.

The file which I uploaded is an installer (or better an extractor). You need Microsofts .NET Framework 2.0 or higher.
The .zip archive has been uploaded.

Download:
Download version 0.1 (.zip Archive)
Download version 0.1 (Installer)

Toggle SpoilerChangelog:

No changelog entries

If I can't post it here in the forum 'cause of it's from Crytek, please say it. I'm really sorry.

Enjoy!

Please upload it as a .zip file cause my Antivirus detect it as a virus and delete the .exe file.

-> uploaded

BTW, what's the shoot-sound from the Mammoth called?? It is not "tank_mammoth_fire.WAV".
