hello

is there any way to add a mandatory download to REN that people have to upgrade before playing on-line ?
I know I don't have any access to do this but I was hoping someone here would have

something needs to be added so when a server is playing a new map REN will auto download and install the new map
like ALL the other C&C games do

I LOVE the game but these old maps are getting really boring
there are some fantastic maps out there but no good server can use them cause most players don't have the maps

You'll have to wait for TT/4.0 patch

so this is already being worked on
fantastic
any idea how long it will be ?

We've been waiting for +/- 2 years so far. Check the tiberian technologies subforum.

would you mind pointing out the thread your referring to
im 2 pages in and just finding others like me asking

also do you know of any servers curently using fan maps ?

The st0rm mix server (And Ultra, sort of) have a lot of fan maps. Go to st0rm.net to find more information.

The Tiberian Technologies subforum is a few sections above this one.

took a while to find them on my list but I see them
though no one is in them
