No. It's either DirectConnect or XWIS

Also, wrong setion.

ReneBuddy would be connecting to XWIS while using DirectConnect instead of with DirectConnect

ReneBuddy would be connecting to XWIS while using DirectConnect instead of with
DirectConnect
Is that the same as connecting to the XWIS server list via RR then I'm assuming?

ReneBuddy is a IM program for XWIS.
It also allows you to see the server listings.
(<http://halo2pac.99k.org/renebuddy/>)

A lot of research

Also that version of Rene-Buddy is broken.. since the xwis protocol changed. (so it raped my
program)

But I fixed it with Rene-Buddy 2!

Which will be released as soon as I finish my work with Renegade-X
