When I join a game everything is normal for about a minute. Then i shoot something(even on my own team) my credits and score go to 0. I can do no damage!!!I've heard of this bug before but I thought it was fixed.

This is called the zero bug and it has never been fixed. It only happens very rarely for most people so I don't think anyone thinks it is a big deal to look into how to fix it. Anyhow, just reload the game and it should fix it.
