APB has been waiting for TT to make their release of Gamma, but today posted this news:
http://www.apathbeyond.com/forum/index.php?showtopic=23787&st=0&#entry44_4924
Basically saying their mod is in the final days of testing...

If they rely on TT then perhaps this is an indication that TT will be out soon?

Idk? I have seen a lot more commits to SVN lately, but AFAIK not a lot has been going on in the TT developers channel or in the TT dev forum here. Could be over at APB forums though?

3 theories. 1. tt wont manage to release before apocalypse, 2. tt manages to release but only 10 to 20 player remain ingame or 3. tt releases but most servers are shutdown till then

I choose Option 1 above: TT won't be able to meet apocalypse deadline on Dec 21, 2012.

IIRC, they're attempting two builds- one that uses TT, and another that doesn't.

I could be wrong, though.

APB Gamma uses scripts 4.0, there is no 3.4.4 version of Gamma.

TT is a bit like top gear.

Ambitious but rubbish lol.

More importantly...when will the next version of TT be released after the main version is released.

Ambitious but rubbish lol.

That's not true, Top gear is awesome.

Hm, looking through the SVN updates, I must say that the most recent ones do not seem to be Renegade related.

im sure most of the people just play renegade because they are still waiting for scripts 4.0 but most of them seem to give up more and more

Top gear is awesome, however they state themselves that whenever they try a project they are "ambitious but rubbish".

Hm, you're right there. As for TT, that's not true though, I would call TT ambitious but without any proper management.
