Rail Gun

Download: Laser Rifle

Laser Rifle

Nice adjustments man. Nothing too drastic, looks really clean. Good job.

And download links don't work.

I like the railgun as well tbh, nice job.

Although, imo it would be better without the laser.

Not going to give my opinion because it will definitely offend you...

However, it seems like most people like your work.

Hey guys, I don't like this thing, but people seem to. I just thought you all needed to know that.

...seriously, what a stupid thing to say.

Anyways, I like the laser rifle, but the slapped on stealth texture was lame. Get rid of that and it'd look pretty cool.

Edit: Actually, the little side thing doesn't fit right- it looks like it's off center. In the pic, it's facing forward while the laser rifle is slightly upwards.

Never been a fan of lazars that pass the guns actual length...to much of an advantage.

Make new weapons if you do anything. Basically copy and pasting stuff from other guns is retarded. They do look okay but thats what every one seems to make is half retarded looking weapon's.

You seem to think that advantages make people better players...

-

Both ss's were took when i shooting the guns, they are off center because i took them at wrong moment, they are centered.

EDIT: The little box on the laser gun is angled, which is why it looks off center.

EDIT: The little box on the laser gun is angled, which is why it looks off center.

Advantages means that players have an advantage over others....If I see a blatant lazer sticking out behind a wall or through a wall, it's a freakin advantage.

Well if he assigned the correct collisionsettings to the laser it cannot even stick through a wall.

@Blacky: I agree with that.

Try it Wubwub who knows what you can make

I put physical and vehicle collision settings on the laser.

Also, the laser is barely noticeable, i don't know why ppl scream advantage over it. It simply looks cool imo, and if you share my opinion, download and enjoy it.  
else, stfu and kindly be on your way. Don't criticize it as if i am actually going to make difference because i made the gun for me, not for you.

I only uploaded it because someone else may enjoy it.

And making my own gun i have tried but i suck bad at making textures for it as demonstrated in the past.
