i didnt know where is hould post it so sorry if its in wring place

Ive "remade" kamuix lite until now to test i runned it on my laptop however to run it as an actual server ill need a lil bit more then 2.5 mbps upload.

does anyone know where i can find a host for a server? or even subrents his server i dont really have a big budget

According to the WW readme... 2.5mb upload is more than enough for a full 32 player server.
