comments?

I've attached the PP one that doesn't mention credit tickle.

Food for thought: Perhaps originally the refinery supplied 50% of credit income and the other 50% was meant to come from some other structure, such as an Ore Silo. So killing either cuts income in half, killing the other removes income completely.

Probably not what happened at all, but its interesting to speculate sometimes...

That's possible yeah. There's a lot of extra dialogue for the tutorial mission too.

There was a lot Renegade was supposed to have. Tiberium silos, communications center, etc.

I wish someone would make a mod about how Renegade should have been, without making it crap by putting in a ton of models that have absolutely no purpose and creating an imbalanced mess.

Well I tried making such a mod yet it was too much work to finish it properly.  
And ren is not big enough to fill servers up for mods like that.

---

Still have the map and the project(Nitromod)  
Not my best work but if someone wants to use it tell me.  
It was kinda a test to see if a more cnc like map works.  
Answer is probably not.  
Though with some help it can be made into a fanmap.

Toggle Spoiler

Main thing is Westwood redesigned the multiplayer quite alot so it depends what kind you want upgraded multiplayer from the current or in beta style.

Yeah, I'd be interested in that. Could you make a release topic in the Mod Release forums? Don't know how exactly the 'logic behind' the big bases are set up but in a lot of cases the bases are too big to defend properly or you spawn inconveniently (e.g. far away from the vehicle production factory).

Although the above map looks well designed, there is one fatal flaw. It is called size.

Yep that is the problem I found out with trying to make a map CNC like or to add all the missing westwood structure.

Even if the map is scaled down there's one other problem I have found out way worse than just the map size.

You can hide in practically any building which would require you to have at least a big team like 16 vs 16 and more mines and what not. Something that is not going to do it for long any more. Though the map does show two refineries + 2 harvesters per team works! I never got to a real test for the map due to being low on players.

I mean how often do you find a building not being defended in say city flying or just empty?

Basically it is very logical some buildings got skipped and not being used it speeds up the gameplay and makes it more manageable. Though a building like a silo could be used more.

Do you have any interest in releasing the work you did? The two Harvesters per Refinery setup would be useful for some of the maps I'm planning that are a tad bigger than the stock maps and have gameplay centering around tanks and field control.

I was planning on making a mod like that. Currently I added the m16 to the GDI rifle soldier, this is the original weapon that was to be used in renegade, plus it was the weapon in TD as well.

Check out this topic ->

<http://www.renegadeforums.com/index.php?t=msg&th=35819&start=0&rid=2> 2503

All the buildings are there except for the alternate conyards.

@Iranian I hope I can give you something usefull soon thingy is I have been a bit busy lately. So hopefully comming week.
